This PDF is going to be used for PB-91275 demo. This demo:

- Must have:

  - o   Extract Information about Text Fields (Size of the Field, Font Name, Font Size)
  - o   Replace a Text on the Text Field
  - o   Inject a Signature Field.
  - o   Signing one Signature.

- Good to Have:

  - a.   PDF validation (it is a PDF file, is a valid structure)
  - b.   Verify if the document is encrypted
  - c.   Extract signatures information
  - d.   Replace a Text from a Paragraph

This is a new paragraph to be replaced. It has a different font

Text field that will have information extracted:

Text field that needs to be edited:

Inject signature field:

Signature to be signed:

Signature already signed:
